TWIST-R-LOCK RETAINER CLIPS

Available in Standard, Hard and Tall versions. All are metal detectable.

The square hole allows the same volume of air to pass through as a round hole - resulting in the same suction.

Use of the insertion tool allows retainer clips to be installed faster and with less effort.

The TALL clips provide a tighter seal and have exceptional tool life.

Each retainer clip has a notch that allows easy rapid insertion of the clip into the belt.

DEPANNER BELTS

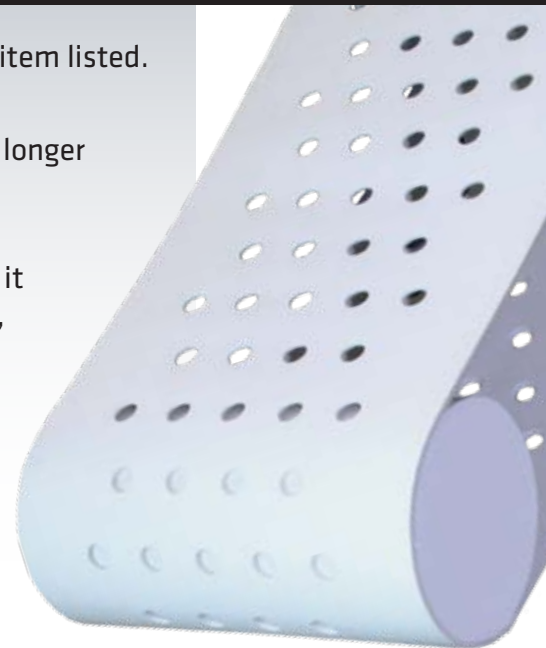

Available assembled with any item listed.

Durable Construction -
12" overlap seam that will last longer than narrower seams

Variable Hole Design -
You design it and we will build it

Lengths available from 69-112"

Widths available from 2-44"
