

AUTOMATIC HONE

Slicing blades are tools. As with any tool, the blades need to be maintained to provide the maximum return on the investment. Honing is a critical part of maintaining a blade.

New hones and replacement parts are available for both 28" and 46" drum slicers. Call Hansaloy for your specific requirements.

When you need **consistency** from the first slice to the last, **Hansaloy** is the one for you!

FEATURES

Cantilevered design lets you free up one side, eliminating interference with blade changes!

Simple installation. Drill 3 mounting holes on one side of the slicer. Utilizes 115VAC single phase power. (optional 220VAC)

Hardened, ground and polished 3/4" dia. support shafts.

Typical installation uses the slicer PLC.

Optional timer available.

Utilizes a new drive motor and heavy duty gear box for maintenance free service.

Long lasting ceramic stones available as well as aluminum oxide stones.

Consistent blade sharpness and maximum edge life when used with Hansaloy slicing blades.

MADE IN

U. S. A.

LATTICE

Hansaloy is the preferred manufacturer of lattice assemblies and blade guides. The Hansaloy lattice is known in the industry as being the most reliable and durable lattice available. CNC machined components provide tight tolerances and eliminate “play” in the lattice. The open design of the lattice makes for easy cleaning. These factors make the Hansaloy lattice the industry leader and virtually eliminate “thick and thin” slicing.

- High strength steel with stainless slide bars
- “Tight tolerance” design & machining
- Clean-up & PM friendly design
- Reliable opening & closing
- One-year limited performance warranty

AVAILABLE WITH:

- Standard Offset Guides
- 4 Prong Rod Style Guides
- Ceramic Offset Guides

SLICE WIDTHS

3/8” to 5/8”, 3/8” to 7/8”, 3/8” to 1”

The “3/8 to 7/8” and “3/8 to 1” models may require an adapter kit depending upon slicer specifications.

RECONDITIONING SERVICE

No obligation repair estimate on **any manufacturer's** Micro or Sabre Slicer style lattice.

Hansaloy lattice reconditioned for “Parts Only Cost” using new replacement components.

Other manufacturer's lattice repaired with only nominal labor cost using all new Hansaloy components.

Lattice Options
(AMF / Bettendorf-Stanford style Micro or Sabre Slicers)

BLADE GUIDES

Hansaloy offers several blade guide styles including standard offset, ceramic offset, and 4 prong guides.

STANDARD OFFSET

- Wear resistant coating
- Excellent blade support
- Offset fingers reduce crumb accumulation
- Appropriate for most breads

4-PRONG, ROD STYLE

- Hardened tool steel
- Minimizes heat generation
- Facilitates clean-up efforts
- Excellent choice for slicing products prone to build-up issues

CERAMIC

- Ceramic blade support surface
- Maximizes guide life
- Minimal heat generation
- Excellent blade support
- Minimal crumb accumulation
